Diploma

Ramnicu Valcea's climate change mitigation projects

- The Ramnicu Valcea's climate change mitigation strategy refers to a **Reliable, Clean and Efficient Energy City** by putting into practice an important number of energy efficiency projects for the refurbishment of public and private buildings, in which are involved the public authority, the citizens and the citizens associations as well as private firms. Currently, the city have about 100 private buildings (block of flats) retrofitted with local/national/European funds.
- **Climate change mitigation projects: 3 park landscaping projects with European Funds, rehabilitation of public lightning with European funds, urban mobility projects (new, less polluted natural compressed gas buses for the public fleet).**
- **14,6 million Euros project (developed during 1999-2009 period with pre-UE adhesion funds) for the implementation of an integrated waste management system in town (new landfill in Feteni, compost station at Raureni, new waste selective system in town, information and awareness campaigns).**
- **Aprox.500.000 Euros (2,5 million RON) funds from the local budget invested in the last 5 years in the City's waste selective collection system.**
- **Waste selective collection campaigns in town developed with the Public Operator, with the ENVIRON and RECOLAMP associations (for the collection of electric and electronic waste from the population) and ECOTIC and The Institute**

Multi family private building before and after refurbishment

Our goals:

01

Raise the citizens' awareness

02

Find and implement new and innovative solutions for the city's environmental, economical and social development

03

Less CO2 emissions in town: more than 70 mil. Euros from European Funds for energy efficiency projects including the improvement of the public transport (35 new buses with NCG, refurbishment of the boarding stations, new and sustainable equipment for the public transport and development of a center equipped with a general traffic management system) and construction on 2 new parks.

04

Have a city designed by people for the best living of people
